Graduated from Pascual Bravo University Institution, I am a software developer with experience in SQL, APIs, and Angular. I specialize in building REST APIs using .NET Core, NestJS, Java, and Laravel. I also have strong frontend skills with Angular. I aim to contribute to a great company by applying my skills and growing professionally in a dynamic and innovative environment.

---

## EDUCATION

---

### Software Development Technologist, institución universitaria pascual bravo

- I hold a degree as a Software Development Technologist, with a specialization in web and mobile development. I excel in full-stack web development, applying my knowledge in both frontend and backend to build efficient, scalable, and high-quality solutions.

---

### Graphic Designer (Advertising Design), CESDE

- I am a technician in Advertising Graphic Design, specialized in layout and color theory. I stand out for my ability to create visually appealing and functional compositions, with strong attention to color harmony and structured design.

---
